### DETAILED ACTION

Applicant's election without traverse of Group II, claims 31-61 and 65-67, claims drawn to a method of preventing and treating an autoimmune disorder comprising administering a composition comprising *Agaricus Blazei Murill* in Paper No.3 is acknowledged.

#### *Election*

Further election of species is required for the elected invention of Group II:

Claims 46-49 are generic to a plurality of disclosed patentably distinct species comprising disorders. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. The Examiner considers claims 46-49 as a Markush group, Applicants must elect one member from this group.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
